

# Hemp in Eastern Kentucky

February 20, 2017 - 6:00 p.m.  
Robinson Center Auditorium

This Mountain Monday session will provide information on topics related to industrial hemp, including:

- What is hemp?
- What is it used for?
- Why would we grow it? Is it profitable?
- Do we know how to grow it?
- What's going on in Eastern Kentucky with hemp?
- Questions and answers.

**Dr. David Williams**  
**Professor and Director**  
**UK-RCARS**

Dr. Williams has been directly involved in agronomic science for his entire career. This includes positions as a practitioner, researcher, and teacher. He has led the industrial hemp agronomic science research efforts within the UK Dept. of Plant and Soil Sciences since and has provided many local, regional and national presentations on the science of industrial hemp production.
